MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: POLICY 16-033- Fort Huachuca Access

1. This policy establishes the criteria and procedures for allowing access to Fort Huachuca.
2. Access to Fort Huachuca is permitted for personnel with a military requirement or affiliation with Fort Huachuca including US military forces and their dependents, military retirees and their dependents, Department of the Army civilians, and other employees of Fort Huachuca to include contractors. Foreign military service members serving or training at Fort Huachuca at invitation of the US Government and their family members are also permitted access.
3. Visitors, contractors and vendors 18 years and older, entering Fort Huachuca, who do not have a DOD identification card, will be subject to a background check before being allowed entry to the installation. Those who present a Common Access Card, or CAC; Military ID; Military Dependent ID; Gold Star ID or other valid DOD credential won't be affected. This change is to ensure that Fort Huachuca is in compliance with Homeland Security Presidential Directive 12, which requires that 100 percent of visitors be vetted prior to entering the installation. The vetting will take place at the Van Deman Gate on a 24/7 basis. Installation Access Badges will be issued upon successful completion of the NCIC III check. Personnel who are denied access to the installation will be given a Denial Waiver packet and it will be their responsibility to provide the necessary information so the Denial Waiver Committee can determine their fitness for access to the installation. Access to Fort Huachuca may be denied in accordance with applicable Federal law, Army Regulation, Fort Huachuca Regulation or Policy. Access to Fort Huachuca is based on the Force Protection Condition (FPCON) in effect at the time of entry. Personnel may experience delays while access control and law enforcement personnel implement the Random Antiterrorism Measures (RAM) program. Fort Huachuca access control operations use an access control system called RAPIDGate RCX to scan and verify identification (ID).
