## Scout reports

e-mail: [thescout@hua.army.mil](mailto:thescout@hua.army.mil)

### MAC luncheon on Wednesday

Pat Call, member of the Upper San Pedro Partnership and Sue Keith, Southeastern Arizona Liaison for the Arizona Department of Environmental Quality will speak at the 11:30 a.m. Wednesday, Military Affairs Committee luncheon at the LakeSide Activity Centre on Fort Huachuca. Topic for discussion is the challenges of meeting area water needs and what the San Pedro Partnership is doing to meet the challenge.

The event is open to the public. The cost of the buffet lunch is \$10. For reservations, call the Sierra Vista Chamber of Commerce at 458-6940.

### Subject board for deployed soldiers

A subject board for family members of military personnel, civilian employees or contractor personnel who are deployed that allows them to post a picture of their loved one is now at the Murr Community Center.

For security purposes, no name of unit or assignment/organization is required. The board will be displayed during special events in the community.

The board will continue to reside at Murr Community Center after each event. Upon redeployment, each person whose picture is posted on the board, will personally pull their picture off the board until all pictures are gone and all personnel have returned safely.

### American Red Cross classes

The American Red Cross offers classes such as: CPR/First Aid, Babysitters' Training, Life Guarding and Learn to Swim. They also hold Instructor classes for those who would like to teach classes. Volunteer opportunities are available at the Raymond W. Bliss Army Health Center. Call 458-4858 for more information or e-mail [svcross@theriver.com](mailto:svcross@theriver.com).

The post Memorial Day Observance on Monday included a wreath-laying ceremony at the gravesite of Chief Warrant Officer Raymond John Reed. His daughter, Karen Cray was present. For more on the Observance see page 4.

## UAVs will have warrant officers

BY SGT. 1ST CLASS DONALD SPARKS  
NCOIC, USAIC&FH PAO

Throughout many newspapers and electronic media outlets nationwide, the latest buzzword in articles has been centered on an acronym familiar with the Fort Huachuca community. The term UAV has been the major headline and now the Army is making an effort to expand the personnel who operate them.

The Army's newest warrant officer military occupational skill, 350U Tactical Unmanned Aerial Vehicle Operations Technician, was created primarily because of the increasing

### Governor creates committee

## Arizona's fallen Operation Iraqi Freedom veterans honored

During an address commemorating Arizona's fallen veterans, Governor Janet Napolitano announced she will create a 21-member volunteer panel to create a memorial honoring all Arizona military personnel who have died in Operation Iraqi Freedom.

"It is time for Arizona to create a monument to encapsulate the pride and sorrow we now feel at losing five of our own men and women, who gave their lives so that countless Iraqi citizens could keep theirs," Napolitano said in a Memorial Day ceremony at National Memorial Cemetery in Cave Creek, Ariz.

To start the process, the governor today signed Executive Order 2003-17 establish-

ing the Arizona Iraqi War Memorial Commission, whose members will design and create appropriate tributes for all of the war's veterans, particularly those who were injured or lost their lives. In addition to the tribute at the Capitol, the commission is charged with working with the City of Phoenix to create a special memorial honoring each of Arizona's soldier's killed in action. That memorial is envisioned to be placed on Piestewa Peak.

"The monument for veterans of Operation Iraqi freedom will take its place alongside Arizona's other war memorials at the State Capitol. Arizona's service personnel deserve nothing less," Napolitano said.

The commission will be bipartisan and will include members of the Arizona Department of Veterans' Services Advisory Commission, the state commander of the following groups: American Legion, Disabled American Veterans, Military Order of the Purple Heart, Veterans of Foreign Wars, as well as the State Commandant of the Marine Corps League. Members will also consist of legislators, representatives of the military, the public-at-large, and two representatives from the Office of the Governor.

The governor said the memorials will be privately funded, and charged the volunteer panel with raising the necessary funds to complete the project.

## No more bucks in tuition assistance fund

BY ERIC CRAMER  
THE SCOUT STAFF

Because of budget constraints, the Fort Huachuca Army Education Center has stopped issuing Tuition Assistance dollars to soldiers.

Dennis Sherrod, education service director for Fort Huachuca, said the local program is out of money, and is awaiting additional funds from the Department of the Army.

"The big reason for this is increased participation because it started paying 100 percent of tuition," Sherrod said. "Before October 1 last year, it only paid 75 percent of

tuition. After October 1, it began to pay 100 percent of tuition."

"We had 6,043 students enrolled in the second quarter of this fiscal year," Sherrod said. "Of those, 1,032 used tuition assistance."

Because of both the increase in the amount of tuition paid, and the increase in the number of students taking advantage of the program, Sherrod said Fort Huachuca has spent more so far this year than it did all of last year.

"So far this year we've spent \$985,000. Last year we spent \$870,000 for the entire year. The scary thing is, our

biggest enrollment is usually in August, and we're not there yet," Sherrod said. He said Fort Huachuca initially had \$1.2 million in funding for tuition assistance, but that the Department of America took back \$280,000.

He said his department is working with the new Southwest Region and with Training and Doctrine Command to acquire additional funding. "I have information from the headquarters level saying that it will cost \$22 million to fund the rest of the year for the entire Army," Sherrod said.

See TA, page 5

# Memorial Day

## President Bush honors the brave and fallen defenders of freedom

The President: Thank you all very much for the warm welcome. Mr. Secretary, thank you for your leadership. Secretary Principi, members of the United States Congress, General Myers, members of the Joint Chiefs, General Jackson and Colonel Ray and Colonel Steedley, veterans, honored guests and my fellow Americans, we come to this Memorial Day with deep awareness of recent loss and recent courage.

Beyond the Tomb of the Unknowns, in Section 60 of Arlington Cemetery, we have laid to rest Americans who fell in the battle of Iraq. One of the funerals was for Marine Second Lieutenant Frederick Pokorney Jr. of Jacksonville, North Carolina. His wife, Carolyn, received a folded flag. His two year old daughter, Taylor, knelt beside her mother at the casket to say a final goodbye.

An uncle later said of this fine lieutenant, "He was proud of what he was doing and proud of his family, a hard working guy — the best guy you can ever know. I hope the American people don't forget." This nation does not forget.

Last month, in Section 60, 1st Lt. Rob Jenkins was buried, along with five other members of a bomber crew. They were lost when their plane was shot down over North Africa in 1942. Rob Jenkins had joined the Army Air Corps after Pearl Harbor, and he was 20 years old on his final mission.

Six decades later, his plane was found and the remains of the crew were carefully identified, returned home and buried with military honors. Rob's sister, Helen, said, "We were very proud that the government would care that much. After all, it was such a long time ago." This nation does not forget.

On Memorial Day, Americans place flags

on military graves, walk past a wall of black granite in Washington, D.C., and many families think of a face and voice they miss so much. Today, we honor the men and women who have worn the nation's uniform and were last seen on duty. From the battles of Iraq and Afghanistan, to the conflicts in Korea and Vietnam, to the trials of World War, to the struggles that made us a nation, today we recall that liberty is always the achievement of courage.

And today we remember all who have died, all who are still missing and all who mourn. And on this day, especially, our nation is grateful to the brave and fallen defenders of freedom. In every generation of Americans we have found courage equal to the tasks of our country. The farms and small towns and city streets of this land have always produced free citizens who assume the discipline and duty of military life. And time after time, they have proven that the moral force of democracy is mightier than the will and cunning of any tyrant.

The widow of one of our Marines in Iraq made this point very simply. "There is good and evil in the world," she said, "That's what's going on. And he was the good." All the good people we honor today were willing to die in the service of our country and our cause. Yet all of them wanted to live. And the images they carried with them at the end were the people they loved and the familiar sights of home.

Not long before his death last month, Army Capt. James Adamowski of Springfield, Va., wrote this to his wife Meighan. "I do my job 110 percent and don't get distracted or discouraged when I'm out flying on missions. However, when I have some down time and get to really thinking, I realize that for all the

good times — all the good things we're doing here, I just plain miss you."

In his last letter home from the Middle East, Staff Sgt. Lincoln Hollinsaid, of Malden, Ill., said how much he appreciated getting mail from his family. He added, "I wish my truck and boat knew how to write."

"I sure do miss them." He went on, "Today would be a beautiful fishing day. I can see it now: drop my electronic anchors, kick my feet up, three poles out with hooks in search for that elusive, yet loveable, catfish."

Americans like these did not fight for glory, but to fulfil a duty. They did not yearn to be heroes, they yearned to see mom and dad again and to hold their sweethearts and to watch their sons and daughters grow. They wanted the daily miracle of freedom in America, yet they gave all that up and gave life itself for the sake of others.

Their sacrifice was great, but not in vain. All Americans and every free nation on earth can trace their liberty to the white markers of places like Arlington National Cemetery. And may God keep us ever grateful.

Almost seven weeks ago, an Army Ranger, Capt. Russell Rippetoe was laid to rest in Section 60. Capt. Rippetoe's father, Joe, a retired lieutenant colonel, gave a farewell salute at the grave of his only son. Russell Rippetoe served with distinction in Operation Iraqi Freedom, earning both the Bronze Star and the

Purple Heart.

On the back of his dog tag were engraved these words, from the book of Joshua, "Have not I commanded thee? Be strong and of good courage. Be not afraid, neither be thou dismayed, for the Lord thy God is with thee." This faithful Army captain has joined a noble company of service and sacrifice gathered row by row. These men and women were strong and courageous and not dismayed. And we pray they have found their peace in the arms of God.

May God bless America.

*"I pray also that  
the eyes of your heart  
may be enlightened in  
order that you may know  
the hope to which He has called you..."*

- Ephesians 1:18a, New International Version

A couple of weeks ago, I was on temporary duty in San Antonio. It is a great city - too bad it's surrounded by Texas. Anyway, a friend and I attended a church on Mother's Day in a crowd of almost 2,000 - and there were three other services of that size every Sunday. Following worship, we went looking for a cup of coffee at the visitors' center.

We had attended the church before, and saw a man we met then. After some small talk, we talked about the needs of our churches, the trials and temptations of what the "national bodies" were going through and how this particular church was making such an impact in San Antonio.

The man took us to the bookstore and pointed out a small book on prayer. He said that his church had read it as a study - over 1,000 people - and they decided to pray.

The book, "Fresh Wind, Fresh Fire," by Jim Cymbala, is about the Brooklyn Tabernacle and how prayer turned it around, creating ministries in the streets and around the world. I bought the book, read it and now recommend it to you.

Prayer is not an easy thing; the "pray-er" has to be prepared for what he/she is asking and also for the results. Prayer is conversation with God and like a conversation with a loved one, prayer should be viewed as something with results. And what should you and I pray for?

This weekend I saw the movie, "Bruce Almighty". It wasn't a theological mind-opening movie, but it did have something to say among all the humor and sight gags (I recommend it for a great laugh, but not for small child viewing). Jim Carey gets the powers of God (Morgan Freeman) and takes advantage of it. Not to let the movie theme out of the bag, I'll just say here, that Carey's use of the power is what I think people would typically do if they were god.

Returning to the question, "What should you and I pray for?" Morgan Freeman gave me some insight. "God" is climbing a ladder and leaving. Bruce asks that if he needs God should he "come up" to him. God comes off the ladder and says, "Too many people look "up" for the answer - as if I did it all. But I created you and I gave you the power within yourself to do miracles." While I don't totally agree

with that, I do believe that God empowers each of us to deal with the part of the world we live in - and beyond. I believe that as we pray, we bring up the power from within, and with the help of God, we live out life, miracles and all.

In another part of the movie, Bruce is in a lot of emotional pain. In talking to God he asks, "What should I pray for?" He then prays for the end of hunger and the start of world peace. God says, "That's pretty good, if you're running for Miss America." Then he asks for a real prayer. Bruce's prayer then goes beyond his needs to the needs of someone else. God says, "Now *that's* a prayer."

So, what should we pray for? Meaningful prayers are those that go beyond "us" and are for others. They are prayers where we may not see a pay off or may not even know the results immediately. Prayers for the weak, the hurt, the afraid, the lost are prayers of power - and love.

Prayer is a powerful part of our being. We use it to have conversation with God about someone other than ourselves. The interesting part, for me, is that as I pray for others, God knows what I need - and he takes care of that as well. So, whatever your tradition is, pray. Pray as if everything you say counts - because it does - with God - for creation.

# Psychiatrist discusses harassment, violence, abuse against women serving in the US Armed Forces

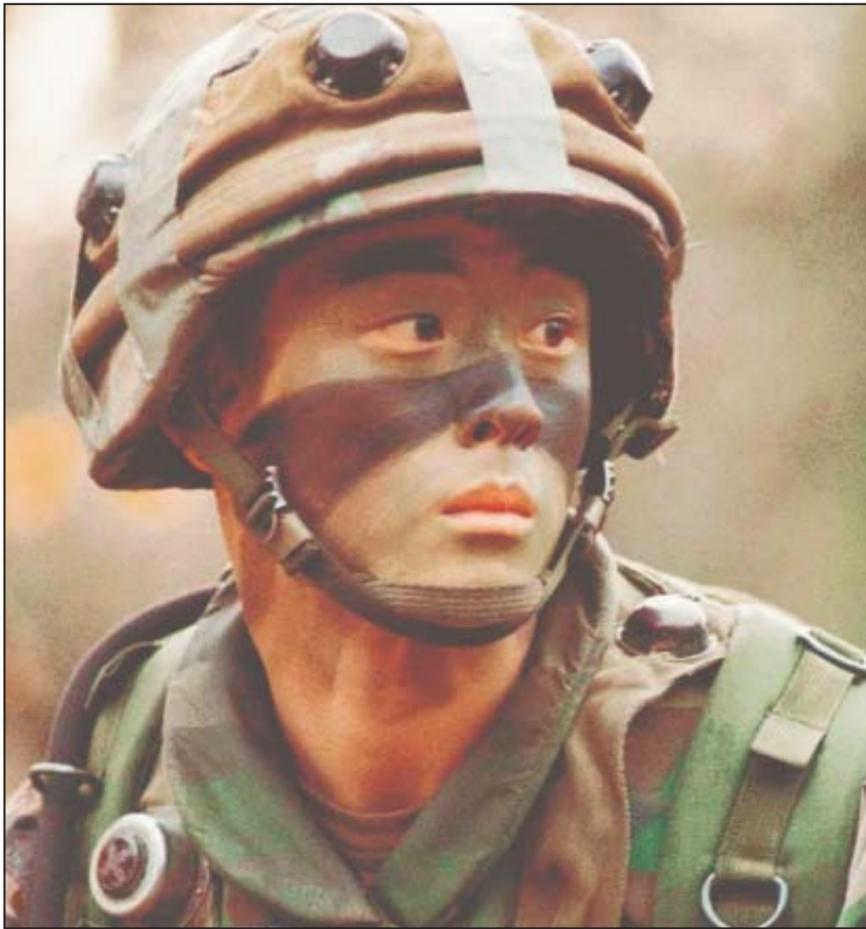

Photo courtesy US Army

BY RUDI WILLIAMS  
AMERICAN FORCES PRESS SERVICE

In the past dozen years, sex scandals have rocked the military services, going back to the Navy's Tailhook and the Army's Aberdeen Proving Ground in the 1990's, and most recently, the Air Force Academy.

But Department of Defense psychiatrist Army Dr. (Lt. Col.) Elspeth Cameron Ritchie emphasizes that sexual trauma and domestic violence aren't common experiences among women in the military.

"However," she said, "it does occur," adding that any such situation "is a problem and something we should try to eliminate." She also stresses that there are different dynamics and different statistics on sexual harassment, sexual trauma or assault, and domestic violence.

When it does surface, some civilian "experts" try to make it sound like there's an epidemic in the military. But Ritchie pointed out that it's an unfair comparison between the incidence of cases in the military and those in the civilian sector. The military is

mainly young men, and domestic violence is higher in that age group.

In addition, she said, the military does more surveys on the prevalence on sexual trauma and abuse. It is also better at the detection of domestic violence, and getting the perpetrators either into treatment, or getting punished, whichever is appropriate. In the civilian world, data collection on domestic violence may not be centralized or shared across states to the extent it is in the military environment, which makes it harder to compare the two rates.

Women in both the civilian and military worlds may be reluctant to report domestic violence, either because of fear of the batterer or concerns about the impact of reporting on his career.

On the other hand, military women have other concerns.

For example, many don't report being raped, because there are so many barriers to disclosure in the military," said Ritchie, program director for DoD's mental health policy and women's issues.

"Often women – this is true for military

and civilian – may feel embarrassed or ashamed," she noted. "She may think nobody would believe her. She may worry that she will be further hurt if she reports somebody that will retaliate on her."

Military women also worry about being ostracized by other unit members, Ritchie said. "Often if there are some allegations of rape, it really pulls the unit apart with people falling into two camps as to what they think really happened.

"Some alleged victims may worry about the effects on their military career," the psychiatrist said. "A common scenario is people going out drinking together coming back to the barracks room and something happens where she says, 'He forced me.' He says, 'No, it was consensual.'

"In those situations, she may think, 'Well, I'll never have any way to prove it, so why should I say what happened,'" Ritchie said. "In sexual cases there is very often no physical evidence. If there is physical evidence of intercourse, there might not be evidence of rape."

Power imbalance in the military also becomes an issue when sex scandals occur. For example, the scandal at Aberdeen involved drill instructors and recruits. A female recruit couldn't ask a drill sergeant for time off to report a rape by a drill sergeant. And there was a perception that all the drill sergeants were involved.

Under those circumstances, who could the recruit tell? Thus the alleged victim can feel isolated and not know who to talk to, Ritchie noted.

However, there are many reasons to disclose a sexual assault as soon as possible, Ritchie stressed. One can get the appropriate intervention from the medical system and receive psychological support. The sooner the assault is reported, the more likely it is that forensic evidence can be detected.

For example, urine can be tested for so called "date-rape" drugs, if there is a question of their use by the perpetrator. Most importantly, reporting an assault reduces the chances of it happening again.

In the case of domestic violence, it's classically the husband beating the wife, but not always, she pointed out. Ritchie said there's a common cycle in domestic violence. One is the battering phase, where the wife's beaten and gets very upset.

"Then the husband apologizes, saying 'I'll never do it again,'" Ritchie said. "He brings flowers and there's kind of a honeymoon period and everything is fine for a while.

"Then, maybe the husband becomes more controlling and questioning the wife

about what she's doing," she said. "He gets irritated and complains – dinner is not cooked right, the kids aren't doing what they should and often the battering occurs again."

Ritchie added that sexual harassment is another entity.

For one, "sexual harassment is probably much more common and less likely to be reported," she noted.

Over the years, DoD has done a number of sexual abuse surveys, the doctor noted. "The best survey we have was done in 1999 where 8.6 percent of military women said they were sexually assaulted during their military service," Ritchie said.

She said any of these issues — sexual abuse, domestic violence or sexual harassment — can lead to depression. "A lot of work has been done with military veterans that have shown a correlation between sexual trauma and depression, anxiety and physical symptoms," Ritchie said.

The military has developed a number of programs designed to reduce both unintended pregnancies and sexual assault. Most emphasize common-sense precautions such as sticking with a buddy both going to and leaving a party.

**“Often women – this is true for military and civilian – may feel embarrassed or ashamed.**

**Lt. Col. Elspeth Cameron Ritchie, U.S. Army psychiatrist**

It is also critical for men to receive education. "No one wants to wake up in the morning to a loud knock on the door, and being accused of rape," Ritchie said.

The services have learned a lot since Tailhook and Aberdeen, she pointed out. The Navy now has a sexual assault victim intervention program. The Army has sexual assault review boards at each major medical facility. In addition, the Department of Veterans Affairs now offers treatment for sexual trauma suffered while in the military.

DoD and Veteran's Administration held a joint conference last year on military and veterans' health concerns, where these issues were highlighted. In addition, DoD hosted a conference on doing research in domestic violence.

In short, Ritchie concluded, the military is committed to education to prevent sexual assault, to provide sympathetic support for victims, to prosecute the accused, and to punish those found guilty.

# Security threat levels not the same for all agencies

The world has changed since September 11, 2001. We remain a nation at risk to terrorist attacks and will remain at risk for the foreseeable future. At all threat conditions, everyone must remain vigilant, prepared, and ready to deter terrorist attacks. The following threat conditions each represent an increasing risk of terrorist attacks. Beneath each threat condition are some suggested protective measures, recognizing that the heads of Federal departments and agencies are responsible for developing and implementing appropriate agency-specific Protective Measures:

**1. Low condition (green).** This condition is declared when there is a low risk of terrorist attacks. Federal departments and agencies should consider the following general measures in addition to the agency-specific protective measures they develop and implement:

- Refining and exercising as appropriate preplanned protective measures;
- Ensuring personnel receive proper training on the Homeland Security Advisory System and specific preplanned department or agency protective measures; and
- Institutionalizing a process to assure that all facilities and regulated sectors are regularly assessed for vulnerabilities to terrorist attacks, and all reasonable measures are taken to mitigate these vulnerabilities.

**2. Guarded condition (blue).** This condition is declared when there is a general risk of terrorist attacks. In addition to the protective measures taken in the previous threat condition, federal departments and agencies should consider the following general measures in addition to the agency-specific protective measures that they will develop and implement:

- Checking communications with designated emergency response or command locations;
- Reviewing and updating emergency response procedures; and

- Providing the public with any information that would strengthen its ability to act appropriately.

**3. Elevated condition (yellow).** An Elevated Condition is declared when there is a significant risk of terrorist attacks. In addition to the protective measures taken in the previous threat conditions, federal departments and agencies should consider the following general measures in addition to the protective measures that they will develop and implement:

- Increasing surveillance of critical locations;
- Coordinating emergency plans as appropriate with nearby jurisdictions;
- Assessing whether the precise characteristics of the threat require the further refinement of preplanned Protective Measures; and
- Implementing, as appropriate, contingency and emergency response plans.

**4. High condition (orange).** A High Condition is declared when there is a high risk of terrorist attacks. In addition to the protec-

tive measures taken in the previous threat conditions, federal departments and agencies should consider the following general measures in addition to the agency-specific Protective Measures that they will develop and implement:

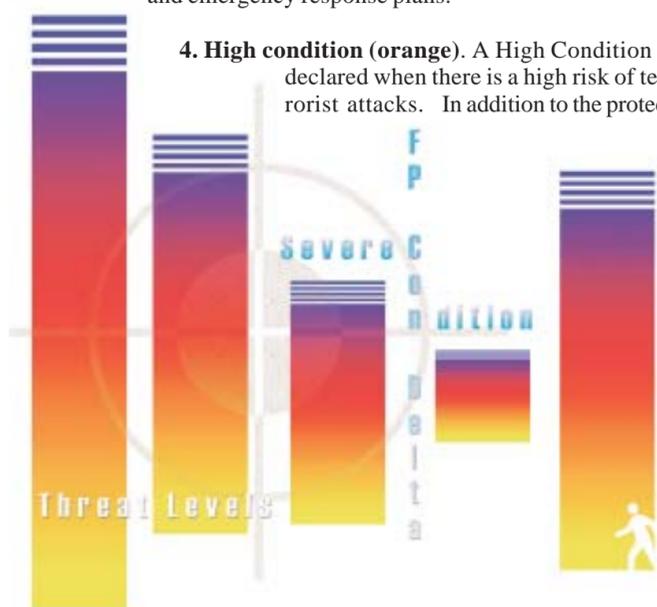

- Coordinating necessary security efforts with federal, state, and local law enforcement agencies or any National Guard or other appropriate armed forces organizations;
- Taking additional precautions at public events and possibly considering alternative venues or even cancellation;
- Preparing to execute contingency procedures, such as moving to an alternate site or dispersing their workforce; and
- Restricting threatened facility access to essential personnel only.

**5. Severe condition (red).** A severe condition reflects a severe risk of terrorist attacks. Under most circumstances, the protective measures for a severe condition are not intended to be sustained for substantial periods of time. In addition to the protective measures in the previous threat conditions, federal departments and agencies also should consider the following general measures in addition to the agency-specific protective measures that they will develop and implement:

- Increasing or redirecting personnel to address critical emergency needs;
- Assigning emergency response personnel and prepositioning and mobilizing specially trained teams or resources;
- Monitoring, redirecting, or constraining transportation systems; and
- Closing public and government facilities.

## Memorial Day ceremony offers solice

BY NELL DRUMHELLER  
SCOUT STAFF

It was warm on Monday, not hot, but caressingly warm. The sky was a brilliant blue, the sun shone brightly and the shadows cast by the leaves on the trees dappled the green grass with dancing designs. If it had been any other day it would have been ideal for a picnic, taking lazy pleasure of nature and the company of a few good friends.

But this was Memorial Day, and while many Americans spend this day in personal pleasure pursuits, those gathered at the Fort Huachuca cemetery had something else in mind.

In 1868 General John Logan, national commander of the Grand Army of the Republic, proclaimed their first Memorial Day as a day of remembrance for those who have died in our nation's service.

The solemn group gathered under the trees on Monday came to pay their respects to the men and women in uniform who lost their lives in defense of this country.

Each year a gravesite is chosen to be honored. This year's honoree was Chief Warrant Officer Raymond John Reed, interned here falling his passing Aug. 13, 1987.

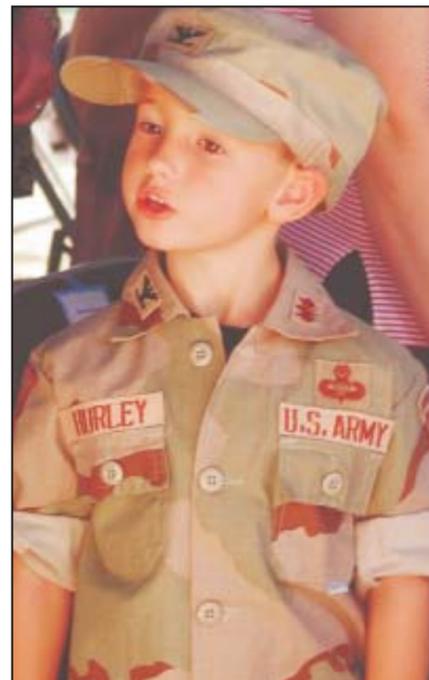

Reed was born in New Orleans in the days before the Depression. He joined the Army at 17, as he put it, "Because it meant food in my belly every day and a place to sleep, and I was able to send a few bucks home to help out every month."

He soon made the Army his home; and spent 30 years in uniform serving with honors in WWII and Korea. He retired from

the Army in 1964, and continued his career working for the government as Communications Chief in Greely Hall.

The ceremony was like hundreds of others held that day across the country, patriotic music was played, and moving speeches were made. The crowd was a cross section of America, veterans with their hair no longer "in reg.," soldiers with their crisply ironed uniforms, women in demure hats, children restless but respectful seemingly in awe of the pageantry of the presentation of the colors.

During a moment of silence, when each member of the audience was asked to pause in remembrance of the sacrifices of others, the only sounds heard were the chirping of birds, the rustle of leaves in the trees and a restless infant.

Left: Spc. Jon Jones of the Honor Guard shows his respect to the fallen shoulders with a 21-gun salute. Right: Paul Hurley, 5, came to the ceremony dressed in full battle dress uniform in honor of his deployed father.

# Calibration lab keeps mechanisms in balance

BY BETH HARLAN  
SCOUT STAFF

The Testing Measurement Digital Equipment Calibration Lab on Fort Huachuca is here to keep the technical equipment on post at its best.

The TMDE Calibration Lab calibrates and repairs any type of equipment that may need to be tested for accuracy. The lab works on all sorts of equipment from torque wrenches to signal generators.

"A lot of people do not realize how important calibration is" explained Manuel Vera, supervisor of the lab. "Let's say that a helicopter went down, the first thing that they would do is look to see what equipment was used on it, when it was last calibrated and where," said Vera. This is where the lab comes in to play.

According to Vera the accuracy of the lab can sometimes go to approximately .0001 percent. All of the equipment that is used in the calibration process is calibrated for accuracy as well by four different higher labs all the way up to the National Burial Standards. Some of the

equipment that is used in the lab is so sensitive that just the oil on your hands can change the weight on it. Equipment such as this is handled with extreme care explained Vera. "Everything that comes in here goes out four times better than when it came in," he said.

The lab even has a specially build room for equipment that may have come in contact with radioactive or other harmful material. According to Vera this room is where all of the chemical monitors and other potentially harmful equipment are tested.

"Every thing that is done at the lab has a procedure that must be followed. There is a manual for almost every piece of equipment, in the rare instance that there is no manual we go straight to the manufacture to ensure that it is done precisely and correctly," he explained.

"People depend on us, if their equipment is not calibrated they can not run their test and they lose money" Vera said. People have been depending on this lab since the early 70s when it was first opened. The lab averages about 800 items a year not only from Fort Huachuca but

also from National Guard and Reserve units in Arizona, Nevada, and California.

Since recalibration needs to be done every four months to four years depending on the equipment Vera and his staff of six highly trained techs are kept very busy keeping the equipment up to par.

Mike Ruiz has been with the lab since 1974.

# Youth of Good Character award goes to Smith

YOUTH SERVICES RELEASE

Courtney Smith of the Youth Services Program received a \$10 gift certificate for being chosen as the "Youth of Good Character" for the month of May.

Courtesy photo

Smith has been assisting in the School Age Services home-work center helping younger children with their homework. Smith is a seventh grader and her actions demonstrate the principles of the Character Counts program.

The Character Counts program is taught in the Child and Youth Services programs and teaches the six pillars of character: responsibility, respect, fairness, caring, trustworthiness, and citizenship. Youth learn why the six pillars of character are important and why each person should strive to become a person of good character.

Smith demonstrated the pillars of citizenship: Doing your share to make your school and community better, cooperating, staying informed, being a good neighbor, and caring: being kind, being compassionate, showing you care, helping people.

# Operations security center moves to Virginia

BY ERIC CRAMER  
SCOUT STAFF

About 15 military positions and 14 Department of the Army Civilian jobs will move from Fort Huachuca to Fort Belvoir, Va., with the move of the U.S. Army Network Operations and Security Center.

Advance elements from the unit have already gone to Fort Belvoir. The ANOSC will move in gradual phases over several months.

According to officials with the U.S. Army

Network Enterprise Technology Command/9th Army Signal Command, the move will cost about \$3.9 million. The cost will largely be offset by the improved efficiency of having the ANOSC in the same location with the U.S. Army Intelligence and Security command. The new location will also make it easier for the ANOSC to work with the Defense Information Systems agency, Joint Task Force-Computer Network Operations, the 1st Information Operations Command and the Army Computer Emergency Response team, all located in or near the nation's capital.

The ANOSC was originally established at Fort Huachuca in 2000 as an operational element of the former Army Signal Command. In October last year, to become a subordinate command of the newly created NETCOM/9th Army Signal Command here. The ANOSC provides an operational network connecting DoA and Department of Defense activities.

Moving the ANOSC brings all Army computer network operations to the same area, forming one team to provide the expertise needed to operate the Army's "infostructure."

# Governor implements task force to ensure military presence in Arizona

STATE OF ARIZONA RELEASE

Governor Janet Napolitano on Tuesday signed an executive order creating the Governor's Military Facilities Task Force aimed at demonstrating to the U.S. Department of Defense that Arizona is a prime state to maintain and enhance its military presence.

"I am pleased today to announce that we are taking steps to ensure that Arizona is well positioned to preserve and possibly even expand our military bases and installations when Congress takes up the base retention issue,"

Napolitano said. "The military has and always will have a key

role to play in Arizona's future."

The task force, chaired by R. Thomas Browning and Robert Johnston, will be charged with the responsibility of formulating Arizona's strategy for ensuring long-term retention of Arizona's military facilities and will present its recommendations to the Governor. The task force is comprised of nine voting members and two advisory members.

In addition, two advisory committees will be formed to assist the task force in reaching its conclusions and gathering public input. One will be comprised of local elected officials from across Arizona whose jurisdictions are affected by military installations. The

other will consist of commanders of Arizona's military bases.

"This task force will put Arizona a step ahead in the competition to preserve and bolster our military facilities and I commend the governor for her leadership in this area," Browning said. "we are off to an excellent start."

Voting members of the task force are:

Tom Browning, co-chair, Bob Johnston, co-chair, Tom Finnegan, Sierra Vista, Gene Santerelli, Tucson, Monsignor Richard O'Keefe, Yuma, Lisa Atkins, West Valley, Steve Thue, National Guard, Gilbert Jimenez, Department of Commerce and Lori Faeth, Natural Resources Policy Advisor, Governor's Office

## UAV from Page 1

demand of UAVs intelligence collection on the battlefield, according to Lt. Col. Eric, Fatzinger, director, Office of the Chief, Military Intelligence.

"The creation of the 350U MOS will enable the warrant officers to focus on integrating UAV intelligence collection systems on the battlefield," Fatzinger said. "The warrant will have the ability to work hand-in-glove with the airspace managers and collection managers ensuring UAV missions are integrates seamlessly into the overall reconnaissance effort in support of battlefield commanders."

Fatzinger mentioned this mission was critical because the platoon leader, who as a lieutenant, may have limited technical expertise with UAVs, and will be focused on the overall mission of the unit. The warrant officer, on the other hand, will provide detailed air space and asset management coordinating expertise.

Currently there are twelve warrants holding the 350U military occupational specialty, and the Army is looking at increasing this field by adding up to ten warrants per year over the next five years. The UAV warrant officer class graduated its first four warrants last April. The next class began Wednesday.

"The warrants will bring all of their experience as 96 Uniforms, as pilots from flying these birds, into the operations cell," said Chief Warrant Officer Lon Castleton, Chief Warrant Officer in the MI Corps. "They'll be able to coordinate and plan missions, decide which sensors to use on the aircraft, and coordinate the airspace."

With the creation of the new 350U course, Castleton said one of the problems facing the course is that there are not currently enough UAV noncommissioned officers (MOS 96U) in the field, this is also a relatively new enlisted MOS, to fill all the warrant officer ranks

and requirements.

"So we've taken a very small number of junior ground aviator warrants, on a case-by-case basis, and selected them for 350U training," Castleton said. "Ideally we'd like to only select the 96U NCO who has had two or three assignments, four years in the MOS, and has been in the Army for at least five to 12 years and who has graduated the Basic NCO Course, but that is not possible at this time."

So with the demand so hot for UAV operators, Castleton placed emphasis at the recruiter level to bring in more recruits into the 96U career field and increasing the talent pool of soldiers to select down the line for the warrant officer course.

"We feel right now with our projections that it will be at least a year before we have enough 96U NCOs that we can fill the warrant ranks exclusively from within the MOS," Castleton said. "We don't want to rob all of our stockpile of 96U NCOs right now."

Castleton added many of the warrants that have been taken thus far are sergeants first class, "so we have a lot of talent, experience and energy coming into the warrant field."

One of the original four graduates of the first course is Warrant Officer David Ellis, UAV Operations Technician Track Course manager. Assigned to Company C, 304th Military Intelligence Battalion, Ellis is responsible for the training and development for future students of the 350U course.

"When I went through the course there wasn't anything developed," Ellis said. "So the other three individuals and I sat down and figured out what it was what we were going to need to know based off the duty description and built it (the MOS) from there."

Ellis said the most pivotal aspect of the training was centered on control of airspace and radio frequencies for the UAVs.

"Without airspace, you're not able to fly the missions and collect the intel you need," Ellis said. "It's pivotal for the warrant officer to set up that airspace and coordinate with the Air Force. It's very specialized and you have to know what you're doing."

"Also, you have to know the frequencies for the aircraft, so you'd have to know what we go through to get that set up. We have to be able to de-conflict with other frequencies in the air."

Ellis added that the warrants could bring valuable information to the battlefield by providing the commander the capabilities and limitations of the UAVs and therefore bringing more credibility to the 350U warrant officer field.

"Now that they see the UAV is an operational system, the commanders trust it," Ellis said. "And the amount of intel they get from it, they're the eyes on the battlefield, the commanders love it because they can see with their own eyes and make decisions. And just as important, we don't have to send a human pilot in the air out in harms way."

The 13-year-Army veteran considers it an honor to be one of the first warrant in the MOS and is doing what he said he loves as a technician. He is looking forward to passing his knowledge to future warrants in the course - many of whom he has known of the years.

"I jumped on the chance to do this," Ellis said. "I just try to bring in my past experiences and knowledge that I have, so that way when they get out to the field they're not just out there flapping and not knowing what they're doing."

## THREAT from Page 3

threat of possible terrorist activity exists and warrants a routine security posture.

B) **FPCON alpha:** Applies when there is an increased general threat of possible activity against personnel or facilities, the nature and terrorist extent of which are unpredictable. Alpha measures must be capable of being maintained indefinitely.

C) **FPCON bravo:** Applies when an increased or more predictable threat of terrorist activity exists. Sustaining bravo measures for a prolonged period may affect operational capability and relations with local authorities.

D) **FPCON charlie:** Applies when an incident occurs or intelligence is received indicating some form of terrorist action or targeting against personnel or facilities is likely. Implementation of charlie measures will create hardship and affect the activities of the unit and its personnel.

E) **FPCON delta:** Applies in the immediate area where a terrorist attack has occurred or when intelligence has been received that terrorist action against a specific location or person is imminent. Normally, this FPCON is declared as a localized condition. FPCON delta measures are not intended to be sustained for substantial periods.

## TA from Page 1

He said the education office recommends soldiers who are eligible for Veteran's Administration benefits attempt to use them. He said the center also offers more than 125 college level examination that cost nothing for service members and are accepted by most major universities and colleges.

Sherrod said there has been an increase in usage since the program started to pay 100 percent of a soldier's tuition.

In addition to that increase, several educational programs have become available or have expanded here. Sherrod said the Fort Huachuca Education Center now offers

classes in culinary arts, auto mechanics and fire science technology. Master's degrees are available from Wayland Baptist University in both management and Christian ministry. The Education Center offers University of Phoenix degrees in art and curriculum, and in business and marketing.

Sherrod said this has driven the increase in college enrollment at Fort Huachuca.

For more information about college programs available at Fort Huachuca, call Sherrod at 533-2393, or contact the education technician at 533-2255 or 533-3010 and ask to speak to an education counselor/specialist.

# Community Updates

## Office move set for Garrison HQ

Today and Friday the Garrison commander and his staff will temporarily relocate from Building 41402, Rodney Hall, to the second floor of Building 41412. Building 41412 is located in old post on the corner of Hungerford and Rhea Avenue.

This temporary relocation is to allow for necessary renovations in Building 41402. All phone and fax numbers for staff members will remain the same.

The office will be closed for all non-essential action on May 29 and 30. Full operation will resume in June.

For more information call Suzette Krusemark, cell 507-6789 or pager at 803-4444.

## Smith Ave. construction

As part of the Treated Effluent Phase II irrigation project, Smith Avenue will be cut in two places; between Rhea Avenue and the traffic circle (near the Credit Union) and at the intersection of Smith Avenue and Johnson Road (next to Brock Field).

The construction work is scheduled for June 7.

When the traffic circle is closed, traffic will be routed down Cushing Street to Arizona Street (past Greely Hall) to Irwin Street, then down Irwin Street and Whitside Road back to the stoplight. Christy and Whitside will be open to through traffic. When Smith Avenue is closed at Brock Field traffic will be routed around the construction site over the gravel shoulder of Smith Avenue.

Also on June 7, the contractor will be closing Squire Avenue between Cushing Street and Winrow Avenue. Incoming traffic can be routed to Irwins Street or Cushing Street.

## Health insurance Q and A's

A representative for the Mailhandlers Benefit Plan will be available to answer your questions pertaining to health insurance benefits June 11, from 9 a.m. - 1 p.m. in Room 5, at the Murr Community Center.

If you have any questions regarding this event, call Eva Dixon at 533-5735 or Linda Shelman, 533-5273, at Civilian Personnel Advisory Council.

## 459th Signal Battalion reunion

The 459th Signal Battalion, 1962-1971, is holding a reunion in Tucson, June 17-20.

The reunion is open to all former battalion members and their families and will include a trip to Fort Huachuca, former battalion home station. For information, call Howard Bartholf, Reunion Coordinator at (804)364-2603 or via e-mail at [howardsp5@aol.com](mailto:howardsp5@aol.com).

## ACS support group

The next meeting of an Army Community Service support group for families with

deployed soldiers, civilians and contractors will be held 6 - 8 p.m. tonight, at Army Community Service, Smith Street, Building 50010.

The group is designed to help anyone geographically separated from a loved one as a result of Army deployments, whether the deployed family member is in the military or not.

The support group will answer questions, offer assistance, and provide an opportunity for networking among those who have family members deployed in support of Operation Iraqi Freedom or other military missions.

ACS asks those who wish to participate in the event to register by Tuesday. To register, call the ACS office at 533-2330 or 533-5919.

## Range Closures

Range closures through Wednesday are as follows:

Today - AC, AD, AM, AR, AY  
Friday - AH, AK, AL, AR, AY, T1, T1A, T2  
Saturday - T1, T1A, T2  
Sunday - No Closures  
Monday - AH, AK, AL, AR, AU, AW  
Tuesday - AH, AK, AL, AM, AP, AR, AU, AW, AL  
Wednesday - AP, AQ, AU, AW, AY, T1, T1A, T2

For more information on Range Closures, call Range Control 533-7095.

## Immunization DTAP available

The pediatric clinic now has the immunization DTAP available. If your child is receiving daycare at the child daycare center, he/she will need it to continue services. DTAP is now available at the Raymond W. Bliss Army Health Center after the nation experienced a shortage.

Call 533-9165 for more information and come to the pediatric clinic during regular immunization hours.

## OPM scholarship program

Parents may be interested in advising their aspiring college students of this new OPM program, "Scholarship For Service," that offers college funding in return for a period of employment by the student after graduation.

The program is funded through grants awarded by the National Science Foundation.

The program has been designed to increase and strengthen the cadre of federal information assurance professionals to better protect the government's critical information infrastructure. It provides scholarships that fully fund the typical costs that students pay for books, tuition, and room and board while attending an approved institution of higher learning.

Additionally, participants receive stipends of up to \$8,000 for undergraduates and \$12,000 for graduate students. While still in school, students funded for

more than a year will also serve a paid internship at a federal agency.

The agency may offer students other paid employment while they are on scholarship if it does not interfere with their studies. Information on this program is available at [www.sfs.opm.gov](http://www.sfs.opm.gov).

## Turn Around Point helps soldiers

The Turn Around Point, sponsored by the Chaplain's Office, and operated by volunteers, is a place where you can get almost anything for nothing. All items in the Turn Around Point are donated and are free to customers on a first come, first serve basis. The Turn Around Point is open Tuesdays and Thursdays 9 a.m. - 1 p.m. and is located in Building 52406, across from the Armed Forces Bank.

## ACAP employer visit day

The Army Career and Alumni Program Career and Alumni Program will sponsor an Employer Visit Day starting today at 9 a.m. in the ACAP Center, Building 22420. Representatives from local and national employers will be present to accept resumes and discuss job opportunities.

The public and separating soldiers are welcome to attend. For additional information or a list of employers call 533-5764/7051.

## Carr House open to visitors

Carr House Visitor Information Center is now open 9 a.m. - 4 p.m. Saturdays and Sundays through mid-October. Carr House is located 2 1/4 miles up Carr Canyon Road off Highway 92 in Hereford.

Guided bird walks are offered at Carr House at 8 a.m. on the first and third Saturdays of each month through October. For information, visit Carr House on weekends or contact Rosemary Snapp at 378-9351.

## Men's ministry program

Kino Protestant/ Gospel Service's present the Men's Ministry Program June 8 at 9:20 a.m. Pastor Henry E. Rubin of Christian Deliverance Center is the guest speaker. Refreshments will be served immediately after at the Murr Community Center. For more information, call 533-8774, 538-1251 or 439-9202.

## Burn permits suspended

The Sierra Vista Fire Department will no longer authorize open burning within the Sierra Vista City limits and will not issue burn permits.

Fire chief Bruce Thompson said, "Due to the typically dry conditions we normally face at this time of year and because of the few fires we have already experienced that indicate the potential severity of the coming brush fire season, we have little choice but to take this action."

The Fire Department will continue to monitor weather conditions, but it is expected that the suspension will continue until the area gets significant rainfall, which is anticipated in

midsummer.

The Fire Department regrets any inconvenience this action causes, but suspending open burning until weather conditions are more favorable is necessary for public safety. The Fire Department also urges everyone in the Sierra Vista area to respect the fire potential by being extremely cautious with materials or activities (such as cigarette smoking) that might lead to an accidental fire.

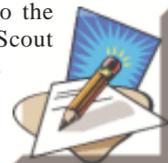

## Publish your upcoming event

Community updates are for any event involving Fort Huachuca and its residents.

To get your upcoming event listed, send it to the Public Affairs Office Scout newspaper staff at [thescout@hua.army.mil](mailto:thescout@hua.army.mil).

Remember to include who, what, where, why and how the event is to take place.

Briefs will run for three weeks prior to the event or the event's registration.

## Congratulations graduates

The Fort Huachuca Scout newspaper wishes to extend its best wishes for the class of 2003 all over Cochise County.

## Farewell and welcome ceremony

The National Guard farewell and welcome ceremony will be held at Chaffee Field June 6 at 7 a.m.

## Morale calls

Family members of deployed soldiers have a new way to keep in touch with loved ones.

Deployed soldiers and civilians can call back to Fort Huachuca via DSN at the following numbers: 821-7111 and 879-71111. The other Morale Calls telephone numbers are 879-0111/1110. For more information, call Chris Lyons III at 538-5966 or e-mail at [lyonsc@hua.army.mil](mailto:lyonsc@hua.army.mil).

# Post's water conservation plan reduces useage by 500 million gallons annually

**BY ERIC CRAMER**  
THE SCOUT STAFF

With Arizona stuck in a long-term drought, water conservation efforts at Fort Huachuca are increasingly important, according to Bill Stein, energy coordinator and utilities sales and purchases officer for the installation.

Stein said that over the past decade, water conservation efforts have reduced the fort's water usage from one billion gallons per year to its current 500 million annual gallons – a reduction of 50 percent.

Gretchen Kent, National Environmental Protection Act coordinator for Fort Huachuca, said the post's population has remained relatively stable during the period water usage fell.

"It's been, including all the people who live inside the fence, about 9,000, plus or minus 500," she said. "We dipped lower a few years

ago, and are now up to about where we were 10 years ago."

Kent said the reduction in water usage means the same number of people are using half the amount of water used before the conservation efforts started to take effect.

Not all the conservation measures are obvious, even though they can lead to large changes in the amount of water used on the installation.

"In 1994, we went from irrigating four months a year, four times a week, in the housing areas, to irrigating two months a year, and twice a week," Stein said. "That was a significant drop, something like 140 million gallons per year."

Stein said the post acted in the mid-1990s to reduce leaks throughout its water system.

"There were some duesies out there, there was actually one two-inch pipe that was valving open and creating a wet-lands environment, a

man-made one, near the front gate," he said.

"There was a significant effort to find and repair leaks," he said. "Stopping the leaks saved an additional 120 million gallons per year."

Less obvious, but equally effective, has been the post-wide replacement of showerheads, and the use of water-free urinals.

"Virtually all of the rest of the water savings has been from the use of technologies like that," Stein said. He said the showerheads used on Fort Huachuca inject air into the water stream to increase the force of its flow.

"These use 1.5 gallons per minute. If you buy a low-flow showerhead, most of them are 2.5 gallons per minute," Stein said.

He said the low-flow showerheads are now used in most places on the installation. In addition, Fort Huachuca has 375 waterless urinals, and is gradually replacing the washing machines on post with "horizontal access" (front loading) washing machines that use less water and

energy than their top-loading counterparts.

"We've placed them in virtually all the housing for single soldiers," Kent said. "We have about 300 units on post right now."

Kent said the washing machines are not exotic. "We're using off-the-shelf Sears Kenmore washing machines," she said. "According to their literature, based on a number of factors, they use 40 to 50 percent less water than a regular washing machine."

Stein said more conservation efforts, including another change to irrigation, may take place in the future.

"We'd like to build a new holding tank on Reservoir Hill. That would let us move to night-time irrigation. If you can irrigate in the evening hours, you miss out on the evaporation and it can lead to a significant water saving."

If you live on Fort Huachuca and want to help in the water conservation efforts, follow the tips included in the table below.

## Water use policy table

Activity	Family housing	Facilities	Remote facilities (unmanned)
Watering with hand held hoses	Authorized at any time	Authorized at any time	Authorized at any time
Watering with unattended hoses	Not authorized at any time	Not authorized at any time	Not authorized at any time
Use of sprinklers	Twice a week in May and June, from 6 – 8 p.m. Bonnie Blink may sprinkle on Wednesdays and Sundays. All other family housing may sprinkle on Tuesdays and Saturdays.	Twice a week, 3 p.m. – 10 a.m., May through September. No sprinklers will be used between 10 a.m. – 3 p.m. except at the Golf Course, Chaffee field and the Eifler sports complex.	Twice a week, 3 p.m. – 10 a.m., May through September. No sprinklers will be used between 10 a.m. – 3 p.m. except at the Golf Course, Chaffee field and the Eifler sports complex.
Use of treated effluent sprinkler irrigation	Not authorized	As effluent is available to meet mission requirements.	As effluent is available to meet mission requirements.
Vehicle washing	No hoses running unattended. On/off nozzles must be used to minimize water waste.	Official vehicles: In authorized wash racks only. Fund-raisers: Parking lots at Thrift Shop and Cochise Theater only.	Not authorized.
Required showerheads	2.5 gallons per minute or less	1.5 gallons per minute or less	1.5 gallons per minute or less
Drip irrigation	Not authorized	Authorized. Must be used within allowable hours. Must be reset within one day after power interruption.	Authorized. Must be used within allowable hours. Must be reset within one day after power interruption.
